Portable Dog Mat

### Anti-Fatigue Mat

If you need added cushion or traction, we also have mats and flooring with a Waffle-Bottom design. The under side of the mats create air pockets for more cushion. Because the mats are softer, they provide better traction for running and quick stops.

Shows both top surface and underside with interlock

Humane Manufacturing, since 1907, has always prided itself in providing safe, sanitary, durable products that ensure the most comfort. Our mats are environmentally friendly, made from recycled tire-derived rubber material that is re-vulcanized (not glued or held together by fillers). The vulcanizing process ensures that the mats are absolutely non-absorbent and will not curl or buckle. Materials used in making the mats also include an anti-bacterial, anti-fungal agent to prevent growth of bacteria. If you desire safe, sanitary, comfortable conditions for your "best friend", you can't afford to be without the benefits of Humane Dog Mats.
